

Jane A. Doe, MD

Dr. Doe is a health technology executive and *in vitro diagnostics* expert with a unique combination of operational, clinical and entrepreneurial expertise focusing on molecular diagnostics, genomics, direct to consumer health, and artificial intelligence. She serves as a strategic interim Chief Medical Officer providing companies with top-down market perspective, an extensive key opinion leader network, and tight relationships to life science investors. Dr. Doe supports both companies and venture firms in technology assessments, clinical trial and regulatory strategies, and pathways to commercialization. Dr. Doe has assisted companies across the value-add chain, successfully facilitating private equity financings, government contracts and merger and acquisition transactions amounting to tens of millions of dollars. She serves on the Advisory Boards for ABC Company, XYZ Company, and 123 Company.

Among her senior executive roles, Dr. Doe served as TITLE at COMPANY where she was responsible for expanding global markets for their core products and building R&D teams for three franchises. As Chief Health Officer at COMPANY, Dr. Doe built direct to consumer health genetic testing portfolio and served on executive team that led to private equity investments at enterprise value of \$2.6B. She led COMPANY Laboratory, one of the country's largest infectious diseases laboratories and pioneered research in DNA sequencing.

In her role as entrepreneur supporting innovative early-stage technologies, Dr. Doe

founded COMPANY, a knowledge domain platform integrating diagnostics, digital health and AI.

Dr. Doe shares her expertise and leadership with several global non-profit organizations and regulatory agencies, including having chaired committees for the ABC Institute, served as program lead for 123 Society of America, and advised the FDA Microbiology Device Committee. Previously, Dr. Doe was a Governor Appointee and member of the Board of Directors for STATE's Science, Technology and Research (STAR) Initiative.

Committed to underserved populations, she received the College of American Pathologists' Award for her work in providing diagnostic testing in a foreign country, awarded the YEAR Professorship in Microbiology, and served as YEAR Visiting Professor to Smith Diseases Institute.

As a practicing infectious diseases clinician, Dr. Doe provides a critically relevant understanding of healthcare drivers to adoption. She has held academic appointments as Professor of Medicine and Pathology at leading institutions. She is frequently invited to speak on topics in clinical diagnostics, healthtech innovations, global health, and women entrepreneurship.

Dr. Doe holds a DEGREE from Harvard University and MD from University. She is an internist, and dual board certified in infectious diseases and medical microbiology.
